World Data Centers conduct international exchange of geophysical observations in accordance with the principles set forth by the International Council of Scientific Unions. WDC-A is established in the United States under the auspices of the National Academy of Sciences.

WORLD DATA CENTER A Oceanography

CATALOGUE OF ACCESSIONED PUBLICATIONS

SUPPLEMENT NO. 20 1989-1990

> World Data Center A Oceanography Washington, D.C. 20235

ABSTRACT

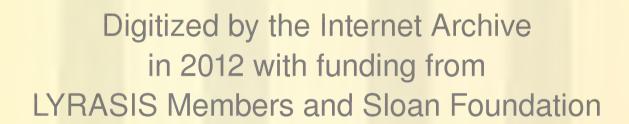

This catalogue lists the oceanographic publications received by World Data Center A, Oceanography, from 1 January 1989 through 31 December 1990. It was compiled by the staff of Cytech Languages Inc.

ACKNOWLEDGMENTS

The following staff members of Cytech Languages Inc. assisted in the preparation of this catalogue: Richard Bullington, Project Leader; Christina Bullington, editing and proofreading; Averill Ring and Kenneth Ring, cataloguing; Lauren Nassikas, proofreading; Averill Ring and Christina Carter, technical typing; Nancy Lee Asman, paste-up artist. Ronald E. Moffatt and Charlotte L. Sazama of WDC-A, Oceanography, provided technical assistance.

INTRODUCTION

The World Data Center system was established in 1957 to collect data from the numerous and widespread observational programs of the International Geophysical Year (IGY) under the principles set forth by the International Council of Scientific Unions (ICSU) and to make such data readily accessible to interested scientists and scholars. The system consists of World Data Center A (WDC-A) located in the U.S.A.; WDC-B located in the U.S.S.R.: several WDC-Cs located in Western Europe, Japan, and Australia; and WDC-D located in the People's Republic of China. WDC-A is established under the auspices of the U.S. National Academy of Sciences where the Coordination Office is located. WDC-A is divided into nine discipline centers whose addresses are given on pages vi and vii. These centers are located in institutions which, in the opinion of the Academy, can best serve the interests of science because of their data handling capabilities for the appropriate scientific disciplines. WDC-A, Oceanography, is collocated with the National Oceanographic Data Center (NODC) in Washington, D.C.

ICSU first assigned responsibility for the operation of the World Data Centers to its Comite Special de Annee Geophysique Internationale (CSAGI). After completion of the IGY programs, CSAGI's responsibilities were terminated in 1959. ICSU then delegated the responsibility for the operation of the World Data Centers in the post-IGY period to its Comite International de Geophysique (CIG). This function is now discharged by the ICSU Panel on World Data Centers. The framework for continued international exchange of data is set forth in the Fourth Consolidated Guide to International Data Exchange through the World Data Centres and the Intergovernmental Oceanographic Commission's Manual on International Oceanographic Data Exchange.

Each WDC is open to visitors and guest workers from any country; all data in the centers are accessible to visitors.

Arrangements can be made to borrow from WDC-A, Oceanography, any publication for which duplicates are available at the Center. This temporary use of publications may not exceed a period of one month, not including time of transmittal.

Copies of extracts of noncopyrighted materials may be provided on request, at a cost not to exceed that of reproduction and mailing. Details for obtaining data and information from the Center are given in the Catalogue of Data.

WORLD DATA CENTER A

World Data Center A consists of the Coordination Office and nine subcenters:

World Data Center A,
Coordination Office
National Academy of Sciences
2101 Constitution Avenue, N.W.
Washington, D.C. 20418, U.S.A.

Telephone: (202) 334-3368

GLACIOLOGY (SNOW AND ICE):

World Data Center A, Glaciology (Snow and Ice) Cooperative Institute for Research in Environmental Sciences University of Colorado Boulder, Colorado 80309, U.S.A.

Telephone: (303) 492-5171 FTS 320-5311

METEOROLOGY (AND NUCLEAR RADIATION):

World Data Center A,
Meteorology
National Climatic Data Center
Federal Building
Asheville, North Carolina 28801
U.S.A.

Telephone: (704) 257-0682 FTS 672-0682

OCEANOGRAPHY:

World Data Center A,
Oceanography
National Oceanic and Atmospheric
Administration
Washington, D.C. 20235, U.S.A.

Telephone: (202) 606-4571 FTS 266-4571

ROCKETS AND SATELLITES:

World Data Center A, Rockets and Satellites Goddard Space Flight Center NASA, Code 601 Greenbelt, Maryland 20771 U.S.A.

Telephone: (301) 344-6695 FTS 344-6695

ROTATION OF THE EARTH

World Data Center A,
Rotation of the Earth
U.S. Naval Observatory
Washington, D.C. 20390, U.S.A.

Telephone: (202) 653-1529

SEISMOLOGY

World Data Center A, Seismology U.S. Geological Survey, MS-967 Box 25046 Denver Federal Center Denver, Colorado 80225, U.S.A.

Telephone: (303) 236-1510 FTS 776-1510

SOLAR-TERRESTRIAL PHYSICS (SOLAR AND INTERPLANETARY PHENOMENA, IONOSPHERIC PHENOMENA, FLARE-ASSOCIATED EVENTS, GEOMAGNETIC VARIATIONS, MAGNETOSPHERIC AND INTER-PLANETARY MAGNETIC PHENOMENA, AURORA, COSMIC RAYS, AIRGLOW):

World Data Center A, Solar-Terrestrial Physics NOAA, E/GC2 325 Broadway Boulder, Colorado 80303, U.S.A.

Telephone: (303) 497-6323

FTS 320-6323 SOLID-EARTH GEOPHYSICS (TSUNAMIS, GRAVIMETRY, EARTH TIDES, RECENT MOVEMENTS OF THE EARTH'S CRUST, MAGNETIC MEASUREMENTS, PALEOMAGNETISM AND ARCHEOMAGNETISM, VOLCANOLOGY, GEOTHERMICS):

World Data Center A, Solid-Earth Geophysics NOAA, E/GC1 325 Broadway Boulder, Colorado 80303, U.S.A.

(303) 497-6521 Telephone: FTS 320-6521

MARINE GEOLOGY AND GEOPHYSICS (GRAVITY, MAGNETICS, BATHYMETRY, SEISMIC PROFILES, MARINE SEDIMENT AND ROCK ANALYSES):

World Data Center A, Marine Geology and Geophysics NOAA, E/GC3 325 Broadway Boulder, Colorado 80303, U.S.A.

Telephone: (303) 497-6487

FTS 320-6487

GENERAL INFORMATION

Arrangement of the Catalogue

This catalogue lists the publications received by WDC-A, Oceanography, from 1 January 1989 through 31 December 1990. To enhance the usefulness of the catalogue, suitable cross references are provided by means of keyword and author indexes.

The publications listed in the catalogue are grouped by countries of origin. Preceding each publication is an identifying catalogue number. The numbering system is designed after that used in other WDC-A, Oceanography, catalogues. The first two digits identify the originating country. The number assigned to each country is given in the Numerical List of Countries. The next two digits, after the decimal point, identify the contributing institution. names of the countries and institutions are printed in capital letters at the beginning of each group of references, preceded at the left by their identifying numbers. In some instances, where specific institutions are not identified separately, the institution number is given as "00." The final three digits following the dash represent the unique number for each document. This document sequence is assigned in the order in which the publication is catalogued. For example, United States is number 39; Scripps Institution of Oceanography, University of California, is .01. Thus, the first publication listed in this Supplement under United States has the catalogue number 39.01-310. If a publication contains data that are listed in the Catalogue of Data, that catalogue number is referenced in parentheses after the publication information. For example, after publication number 39.01-311, information appears (WDCA-139.8 V-9) which shows that this publication contains data for catalogue number 139.8 V-9 in the Catalogue of Data.

In this Supplement, the articles that appear within some journals are indexed individually following the journal entry. For example, following publication No. 60.02-047, the articles included in that publication are numbers 60.02-047.1 through 60.02-047.4. The decimal number is entered beneath the catalogue number. In cataloguing certain journals, articles not relating to the marine sciences are omitted.

In addition to serving as a means of sequencing the publications, the catalogue number constitutes a link between the indexes and the catalogue.

A brief section, which lists miscellaneous journals, reprints and reports, may follow the last institution for a particular country.

Keyword Index

In the Keyword Index, the keywords in every title are placed in alphabetical sequence in capital letters. Below a keyword, all numbers of the documents in the catalogue in which that word appears are listed.

Author Index

The Author Index gives in alphabetical sequence the names of the authors of the publications listed in the catalogue. The corresponding catalogue number(s) follow the name.
